KeyTrak announces approved interface agreement with ADP

KeyTrak and ADP have agreed to create a direct interface between a dealership's ADP Dealer Management System (DMS) and KeyTrak. The approved interface will allow dealerships to transfer vehicle, user and repair order information from the DMS directly to the KeyTrak system.

KeyTrak Vice President of Sales Richard Battle says, "This is an extremely exciting service. This interface will benefit operations as well as sales. On the operations side, the manager can simply transfer the information electronically, so when the vehicle arrives, all they have to do is tag the keys and put the vehicles on the lot!"

When receiving a shipment of vehicles, dealerships receive an inventory list electronically consisting of VIN numbers, make, model, color and so on of the vehicles. In order to get the information from the DMS to the KeyTrak system, historically dealers had to enter the information manually. Entering the data manually is a time-consuming process and increases the opportunity for human error. The approved interface expedites the process, improves accuracy and enhances sales operations.

According to a recent press release on the ADP website, "ADP offers the widest range of HR, payroll, tax and benefits administration solutions from a single source. ADP's easy-to-use solutions for employers provide superior value to organizations of all types and sizes. ADP is also a leading provider of integrated computing solutions to auto, truck, motorcycle, marine and recreational vehicle dealers throughout the world."

About KeyTrak Systems

KeyTrak is the world's leading provider of key and asset tracking systems. KeyTrak helps businesses enhance the security of their operations while improving productivity and reducing costs. KeyTrak systems provide a safe, organized way to house keys for car dealerships, apartment communities, hospitals, military bases, government facilities, hotels, schools, and commercial properties.

The KeyTrak and KeySafe systems are built in a state-of-the-art manufacturing facility located in College Station, Texas. KeyTrak's superior software support team is available 24 hours a day, 7 days a week.
